

SMC Swivel Hardware | Anchorage Connectors

This rescue swivel is a high performance piece of gear with incredibly smooth action and a beautiful feel and finish. The holes are sized to work with rescue carabiners, and allow the lock sleeves to rotate through the holes. The heat-treated axle and a sealed high efficiency ball bearing ensures a smooth rotation. Compact for confined space and for awkward hauling situations. Smooth and rounded sides prevent catching on rocks, litters, or other components.

Key Features

- Lightweight
- Anodized aluminum
- Sealed bearing
- Heat treated axle
- For ropes 9.5 mm-16 mm

Additional Information
