

Oregon Spine Splint

Patient Care | Patient Packaging

Oregon Spine Splint helps to safely remove patients from injury sites without doing further damage to the spine.

Key Features

- Can be re-configured to retract and immobilize the shoulders
- Doubles as a hip or leg splint
- Head padding
- Easy access to the patient's chest and abdomen
- Collar strap
- Carrying case
- Use in place of a conventional short backboard
- Forehead restraint (with ten disposable covers)
- Includes a Shoulder Board (not shown) to help prevent shoulder compression when using a Sked® litter
