

ISC Aluminum Wizard Karabiner Twistlock Hardware | Carabiners and Connectors

The “Wizard” range represents the strongest carabiners we manufacture in both Steel & Aluminium, with minimum breaking strengths (MBS) ranging from 40kN to 70kN. The Aluminium Wizard is a high strength, light-weight Carabiner. Its shape is designed to bias the load towards the spine- the strongest part of the Carabiner. The Aluminium Wizard has a blind nose, to help to reduce snagging. Available in standard (CE & NFPA G) Screwgate, Twistlock & Supersafe models, or ANSI (Z359.12) compliant Twistlock & Supersafe versions.

Key Features

- Aluminum (Anodized)

Additional Information
