

Harken® Lokhead Winch 500 Kit - Standard Pro | Pro Hardware

The innovative LokHead winch is a portable or fix-mounted load-lifting, personnel-hoisting winch used with an unlimited length of fiber rope. The captive head allows the winch to be used safely, and keeps the rope from accidentally releasing. Perfect for fixed or temporary applications and rescue. Harken Safety & Rescue offers the LokHead and its accessories fully boxed in a heavy-duty storage case that allows safe transport and rapid deployment. The kit includes the LokHead winch with reversible plate, winch handle, universal tripod adapter, control lever, 2 carabiners, waterproof case and anchor strap with connectors to offer a variety of mounting options: clamped to tripods, rigged to ropes/strops, or anchored direct to structures.

Key Features

- Encapsulating jaw cover protects fingers and clothing from catching in the winch
- Can be incorporated into tripod design without significantly increasing the overall weight
- Designed to work with rope 10-12.7mm

Additional Information
