

PMI® FAST Patient Restraint System

Patient Care | Rigid Litters and Accessories

[embed]https://www.youtube.com/watch?v=_rhkVZ1Km-I[/embed] The PMI® FAST pre-installed in your litter allows you to lash in a patient in a fraction of the time it takes the traditional way. Color coded shoulder and leg straps hold the patient securely, while wide stirrups hold them toward the head. A quick secure connection is also provided when a connection to a seat harness is needed. Individual straps can be quickly repositioned in the field to accommodate patient injuries. Metal-on-metal buckles mean a secure connection. You will be amazed at the speed and functionality of the PMI® FAST. Litter in photo not included.

Key Features

- Accommodate an injured body part
- Shoulder straps hold the patient in place, even in a headdown position
- No knot tying
- Attaches to almost any rigid frame litter with girth hitches
- Each of the eight buckles is rated for a 500 lb load
