

Skedco Skyhook Rope Winch System Pro | Pro Hardware

This system includes everything necessary for rapid evacuation of mass casualties in a biochemical environment. Because we never know how far away we can get from the Hot-zone, the kit includes continuous loop twisted polypropylene ropes, 1 each for distances of 100ft, 150ft, and 200ft. This kit allows as many as 4 rescuers in level A. There are also 4 clean Skeds for moving patients from the warm zone to decon to prevent dragging contaminated litters outside the area. Instructional video or cd-rom included. This capstan style winch is rated to haul people into helicopters. It fits onto a Sked-Evac® tripod. It can handle unlimited lengths of rope and is self tailing. It has recently been discovered for use in the WMD/Haz-Mat environment. When using continuous loops of rope it can haul as many as 6 victims at one time while delivering empty HMD Skeds back to the Hot-zone. The Skyhook Rope Winch System includes:

- Skyhook winch
- Custom carrying case
- Trailer hitch mount
- Powerhead bracket
- Powerhead
- Standard crank arm
- Floating crank arm (Optional)
- Cordura cover for winch capstan
