

SMC Descending Ring

This inexpensive aluminum ring is intended to be left at the top of a pull down rappel in place of a carabiner to facilitate rope recovery. Low cost means you don't have to think twice if the situation requires leaving the D-Ring behind. More creative applications abound in rescue rigging. SMC Descending Rings are manufactured from a single piece of aircraft quality aluminum in order to insure consistent quality, durability and maximum reliability.

Additional Information

Shipping weight | 0.02 lbs

MBS | 15 kN (3372 lbf)

Height | 0.30" (8.0 mm)
