

## BIG SHOT® Replacement Pouch & Tubing Solutions and Kits | Solutions

BIG SHOT® pouch and replacement tubing is for holding a throw weight until release and ensuring a clean shot every time. With lengthened straps sewn just above the finger hold, the BIG SHOT® launch pad grips the projectile firmly until released by hand or trigger for improved accuracy and productivity. Now you can position the pole at any angle (even upside down!) without the projectile falling from control. Reinforced elastic connection points where tube meets pouch are now extra durable. Rapidly deliver a leader line across difficult vertical or horizontal terrain with this innovative and economical alternative to traditional “line guns”. Unit can be assembled in a matter of seconds and will throw a lightweight Spectra line up to 120 ft vertically or more than 300 ft horizontally.
