

## 10 mm Sewn Eye Rope | Terminations

PMI uses precision stitching to create a permanent, sewn termination that is stronger than any knotted termination and nearly as strong as the rope itself. Heat shrink tubing protects the stitching and the label from abrasion. PMI can sew either one or two end terminations on the following ropes and these are certified as Manufacturer Supplied Eye Terminations per NFPA 1983:2012:

---

### Key Features

- Streamlined permanent termination
- Stronger than knots
- No knots
- Two separate but equal blocks of stitching provide greater safety
- Nearly as strong as the rope

---
