

Skylotec — ACX Power Ascender Kit W/2 Batteries, remote And Storage Case

The ACX battery-powered winch is a motorised system to ensure the transport of persons or loads to areas that are difficult to access and where occasional or recurring work is carried out. ACX is used, among other things, for cleaning facades or windows, for the maintenance of complex building structures, for the rotor blade maintenance of wind turbines or for transporting loads on masts. The ACX POWER ASCENDER considerably simplifies and accelerates work on complex structures and makes expensive access systems or lifting platforms superfluous. Countless rescue scenarios can also be carried out efficiently and with minimum effort with the ACX. ACX forms a highly flexible system for easy and cost-efficient cleaning or maintenance. In an emergency, the ACX can be controlled by remote control. The operation and use of the ACX can be learned in special training courses.

Key Features

- Simplifies and accelerates work on structures that are difficult to access
- Gentle application
- Control by remote control up to 150 m

Additional Information

Shipping weight | 28.66 lbs

Weight | 11.04 lbs (5007 g)

Max. Service Life | 10 Years

Product Code

SYPOA001
