

## Skylotec — ACX Bluetooth Remote for Power Ascender

This replacement accessory of the ACX POWER ASCENDER increases the safety of every user considerably. With the ACX REMOTE CONTROL, a second person working on the ground can take over the control of the passenger winches up to a range of 150 meters. This enables them, for example, to abseil a disabled and unconscious person in an emergency without an elaborate rescue system. The person working on the rope can override the control at any time.
