

## BEAL Mobile Lanyard Pro | Pro Hardware

The Mobile-Lanyard is a safety lanyard with two anchor positions and is certified to work with the [Monitor](#) mobile fall arrest device, enabling it to be positioned away from the operator. It allows the operator to create a short or longer link dependent on their needs: Short link for work on a gentle slope or to limit the length of a fall (20 cm). Longer link to distance the rope from the operator and to gain freedom of movement (40 cm). **Note that this lanyard also comes with 2 PINCHs to keep the connector in the right position at its end and is equipped with an individual identification number.**

---
