

## BEAL Dragon Top Chest Harness

The DRAGON TOP is a lightweight, adjustable Y-shaped chest harness designed to keep you upright in the event of a fall. It has two fall arrest points and is compatible with the [DRAGON Harness](#) to obtain a full harness. It is also possible to attach carabiners to each shoulder strap for vertical evacuation. This harness is particularly comfortable to use. Its textile back point limits friction in confined spaces. The Y-shaped design of the shoulder straps avoids chaffing at the neck. It also provides a ring for clipping scaffolding hooks and a gear loop on each shoulder strap.

---
