

ZULCO EMT Shears

Patient Care | Patient Packaging

These 7 1/4" long paramedic scissors have stainless-steel blades, and the handles are coated in plastic for comfort. These shears are designed to cut through tape, gauze, clothing, and other materials preventing emergency medical personnel from treating injured people. The stainless-steel blades are able to cut through seat belts and thick clothing materials such as leather. These scissors are made from high quality materials and are designed for professional use. They are the perfect tool for emergency room personnel, nurses, paramedics, and any other first responder who needs to apply first aid.
