

## 8.5 mm BEAL Opera Sport | Sport Rope

With its weight of 48 grams per meter, the OPERA 8.5 is the lightest and thinnest single rope on the market. The first to weigh less than 50 grams. A true concentrate of all BEAL's know-how, it combines several technological innovations to offer a resistant rope that is both ultra-light and ultra-fluid. With its low impact force, OPERA 8.5 is a rope designed for the most demanding climbers, while remaining versatile. In fact, it is also certified as a double and twin rope. This rope incorporates UNICORE® technology for greater strength by making the core and sheath of the rope integral. This allows the climber to pass a cut or torn sheath area, whether descending or ascending, since the sheath cannot bunch to create an impasse.
