

## 9.4 mm BEAL Stinger III Sport | Sport Rope

Versatile, light and fluid, this 9.4 mm rope offers an intermediate diameter for thin ropes. The latter has been reinforced by our UNICORE® technology providing resistance to friction and increased safety. This allows the climber to pass a cut or torn sheath area, whether descending or ascending, since the sheath cannot bunch to create an impasse. This rope is has been designed for high-level climbing but is also suitable for mountaineering.
