

## 8.1 mm BEAL Ice Line Sport | Sport Rope

The must-have rope for ice climbers and expert alpinists alike is now available with the UNICORE® technology. The ICE LINE 8.1mm rope has always been a very popular rope with climbers and ice climbers because of its extreme fluidity and very low impact force. It has not only the weight and flexibility of a twin rope, but also the advantages of a double rope. We have added our UNICORE® technology to this rope, already an icon on the glaciers. By making the core and sheath of this thin rope integral, we reinforce your safety as well as its resistance to friction.

---

### Key Features

- Regular braiding for more fluidity
  - Very low impact force
  - Unicore
-

## Additional Information
