

BEAL Be One Screw Beal |

A carabiner for belaying

BE ONE SCREW is a compact screw lock carabiner. It is particularly suitable for single ropes. "BE ONE SCREW" is a compact rifle with screw lock. Its contact surface has been optimized by using a 12mm diameter cylindrical profile. It is less constraining for the rope and limits its wear during repeated descents. It also makes it easier to slide when giving slack. These characteristics make this carabiner ideal for use in belaying, leading or top-roping. **While these may be "sport" carabiners they can also be used in the Pro world.**

Key Features

- Aluminum
- Perfect for use with single rope with and Air Force 1
- Follows the natural curvature of the rope

Additional Information

Shipping weight | N/A
