

BEAL Aeroteam IV Harness Beal |

Easy to use harness

The AEROTEAM IV harness is a lightweight harness designed for groups/clubs and children. It is made up of comfortable foam padding at the waist and thighs and rigid thigh straps. It is comfortable, easy to put on and easy to use for beginners. This one size harness fits sizes from XS to XL and weighs 395g. Warning! This harness is not suitable for canyoneering.

A safe, tailored harness

To make practice safer, the AEROTEAM IV harness has a wear indicator. The rear elastic can be changed using a replacement kit. An individual identification number guarantees its traceability and a label window allows for precise tracking.
