

BEAL Aero Classic Black Harness Beal |

Warning! This harness is not suitable for canyoneering!

The AERO CLASSIC HARNAIS is a classic design, one-size fits all harness weighing 385g. It features automatic adjustment buckles on the thighs. The usual two belt buckles are replaced here by a clever sliding system ensuring automatic centering of the cross-piece. Lightweight and versatile, it includes no less than four gear loops, two of which are pre-formed on the front for quick and easy gear access. This harness also has an individual number and a personalization window for better traceability.

Note that it is made of recycled polyester fabric.
