

BEAL Swing Kit Beal |

A bag for easy handling.

The SWING KIT rope bag is a 17-liter bag with a double opening that is very resistant. It allows you to use one side to equip the handrail and the other to equip the rappel. Practical, it optimizes the weight of the equipment, facilitates and secures the handling of the rope and prevents it from getting tangled.

Robust and comfortable

This bag is comfortable to carry thanks to its padded and adjustable back and shoulder straps. Its water evacuation is optimal thanks to its top and bottom closure system with two large, very robust metal toggles, made to work in wet and muddy environments. Additionally, its fluorescent orange color provides high visibility at all times.
