

## BEAL Dynaclip Sport | Sport Gear

Lightweight and compact, the DYNACLIP lanyard's seams are protected by a molded sheath for added safety and durability. Its performance, especially dynamic, is also far superior to that of a conventional sewn tape sling.

We have developed the DYNACLIP lanyard in three lengths adapted to different uses: The 40cm lanyard is suitable for indoor climbing, by children or to use pulleys in adventure courses. The 50cm lanyard is ideal for crag climbing, to clip into the belay and for top-roping and the 75cm lanyard is used for belaying on long routes.

### Additional Information

**Shipping weight** | N/A

**Diameter** | 9 mm
