

## BEAL Dynaloop

### Webbing and Cordage | Sewn Webbing, Straps and Loops

The BEAL Dynaloop is a multifunction sling for climbing and mountaineering. With its 8.3mm diameter and its 22kN resistance, the DYNALOOP sling is an essential piece of gear for your mountain outings and rope handling. You can use it for belaying, but also to set up a triangle anchor or to set up an anchor around a rocky spur. In addition to being dynamic, the rope has another advantage over a conventional webbing: the core of the rope is protected from UV and friction by the sheath, while all the threads of a webbing are exposed. The seams are protected by a heat-shrinkable sheath. Two features that make the whole thing more secure and durable.

#### Additional Information

**Shipping weight** | N/A

**Length** | 120 cm (1.2 m), 150 cm (1.5 m), 60 cm (0.6 m)

**Brand** | [Beal](#)

**Diameter** | 8.3mm

**Material** | Polyamide

**MBS** | 22 kN (5,000 lbf)

**Compliant** | CE, EN 566:2017, UIAA 104
