

The BEAL Jammy self-locking sling is made of aramid and polyamide and offers a very high resistance, even in case of strong heating. Thanks to the Technora aramid technology, it does not suffer from being repeatedly folded and remains flexible and able to grip even small diameter ropes. Its seam is protected by a heat-shrinkable sheath and the material used makes it unmatched in lightness compared to mechanical systems. The characteristics of the JAMMY sling make it a must have, especially when making self-locking knots to secure rappelling. But also to make a rope clamp for quick hauling. We recommend its use with Prusik and Machard knots.

Key Features

- Light and compact.
- Sewing protected by a heat shrunk sleeve.
- Remains flexible after repeated use.

Additional Information

Shipping weight | N/A

Size | 13.7" (35 cm), 19.7" (50 cm), 23.6" (60 cm)

Brand | [Beal](#)

Diameter | 5.5mm

Material | Aramid

MBS | 22 kN (5,000 lbf)

Compliant | CE, EN 566:2017, UIAA 104
