

BEAL Monitor Beal |

Prevent falls when working at height

The MONITOR fall arrester has a swiveling side plate for ease of installation on the rope and to limit wear and tear. A lateral brake converts the MONITOR into a rope clamp for work positioning. It can also easily follow the operator both up and down and lock in the event of a fall. It can be used with the MOBILE-LANYARD with two anchoring positions.

Key Features

- Cam function reduces abrasion to the rope when activated
- Swiveling side late for easy rope installation
- Easily locks in the event of a fall
- Converts to rope clamp for work positioning
