

## BEAL Volcano Prusik Beal |

### 50% aramid for a longer lifespan.

The particularity of VOLCANO ropes is that they are made out of 50% Aramid mixed with polyester threads. While Prusiks in conventional ropes have a short lifespan because they melt quickly under the effect of friction, the Aramid used in our ropes protects them from melting and greatly increases their lifespan. These ropes are available in several sizes: 8 mm, or 10 mm and are 27.5" (70 cm) in length depending on the knot used.

---

#### Key Features

- 50% Aramid mixed with polyester
- Aramid material protects from melting
- Increased lifespan

---

#### Additional Information

**Shipping weight** | N/A

**Length** | 27.5" (70 cm)

**Diameter** | 10mm, 8mm

**Material** | Polyamide/Aramid

**MBS** | 18 kN (4000 lbf)

**Compliant** | CE, EN 354, EN 795B

## Product Code

BOBV10.70 | 10mm

BOBV08.70 | 8mm
