

SMC Apex 1.5" Double Swivel Pulley Pro | Pro Hardware

The Apex Double 1.5 excels in complex rigging setups, featuring dual sheaves and a becket for advanced scenarios, ideal for dynamic deflection or complex haul systems. This mid-line attachable pulley employs a low-profile, patented, triple-action lock mechanism for safety, involving three steps: pivot the lock button, depress it, and then swing open the side plate. Easily closing the side-plate reactivates the lock, ensuring a firm rope grip. This intuitive and ergonomic design includes symmetrical side-plates, ideal for seamless integration with Prusik-based progress capture systems. It simplifies setup and minimizes rigging errors. The large swivel eye is tailored for up to three carabiners, it and the becket are and are soft-goods-compatible, allowing carabiner elimination.

Key Features

- One-handed operation
 - NFPA-G Rated
 - Connections are soft-goods-compatible.
 - PMP side plates - designed to be Prusik minding.
 - Made in the USA
-

Additional Information

Shipping weight | 1.06 lbs

Dimensions | 6.68 × 2.89 × 2.27 in

Weight | 16.9 oz (478 g)

Compliant | CE, NFPA 2500 (1983) 2022 ED (G), UKCA

Material | Aluminum, Stainless Steel

Dimensions | 6.68"x2.89"x2.27" (171mm x 73.66m x 57.66mm)
