

## BEAL DYNADDOUBLECLIP 40-75 CM Beal |

A double 9mm lanyard for belaying and rappelling. The Beal DynaDoubleClip is a dynamic lanyard designed to increase safety and speed when both clipping into belays and setting up rappels. Unlike static slings, the dynamic rope can absorb the impact of falls onto the belay set up by either the belayer or the climber, increasing safety. For added safety and durability, its seams are protected by a molded sheath.

---

### Key Features

- 9mm dynamic rope
- 15kN (3,372 lbs)
- Lightweight and very compact.

---

### Additional Information

**Shipping weight** | 0.2 lbs

**Diameter** | 9 mm

**Material** | Nylon
