

BEAL Dyna Double Clip 40-75cm Sport | Sport Gear

A double 9mm lanyard for belaying and rappelling. The Beal Dyna Double Clip is a dynamic lanyard designed to increase safety and speed when both clipping into belays and setting up rappels. Unlike static slings, the dynamic rope can absorb the impact of falls onto the belay set up by either the belayer or the climber, increasing safety. For added safety and durability, its seams are protected by a molded sheath. [Notice UIAA Certification Declaration of Conformity](#)

Key Features
