

Heightec® Prism Double Lock Descender

The Prism™ descender is a completely new product that offers great functionality to rope access workers. It contains two new patented principles; a mechanism that multiplies the braking force applied by the user providing fine control, and a new design of a secondary brake that minimizes the possibility of uncontrolled descent. An additional capability of this device is the ability to unthread the secondary braking system, which allows the rope to be easily pulled back through the device during short ascents. **Please note that all PMI Outlet items have limited stock.**

Key Features

- Double-breaking mechanism will stop if released or panic squeezed
- High-strength aluminum with stainless steel friction surfaces
- Parts visible for easy inspection and maintenance
- Patented variable friction design eliminates the need for a 2nd carabiner
- Designed for rope diameters between 10.5 mm and 11.5 mm

Additional Information

Shipping weight | 1.1 lbs

Compliant | CE, EN 12841-C, EN 341-B

Brand | [Heightec](#)

Sizing Info | 10.5-11 mm rope

Max Rope Size | 11.5mm

Product Code

HD26181
