

SMC Force Series TAC-D Non-Locking

The SMC Force TAC-D offers a unique 'Tactical' matte anodization process. This produces a carabiner with reduced shine and glare, that is perfect for military, law enforcement, and hunting applications where covertness is a must. This carabiner offers the same great quality of the SMC Force D, in a much stealthier package. At 31kN (almost 7000lbs) SMC's Force TAC-D is one of the strongest aluminum carabiners in the world.

Key Features

- Generous gate clearances with deep baskets provide effortless clipping
 - Effortless and simple Screw-lock option provides added security against accidental opening
 - ISO Cold-forged from aircraft-quality aluminum
 - Classic D shape carries loads toward stronger, non-gated side
 - Low cost, high strength qualities perfect for recreational climbing, military, law enforcement, and OEM applications
 - Hooded gates offer smooth rope-bearing surfaces
-
