

## SMC Radius Ring

Designed to meet the demanding requirements of arborists and professional riggers, these rings feature an ultra-smooth interior radius for smooth, predictable movement on a harness bridge or as part of a friction saver. The best-in-class strength ratings are a testament to the quality of the material and production techniques. Power users will appreciate the Radius Rings superior durability and toughness. Because these rings cannot accidentally open, they are ideal for remote anchor points where nothing can be left to chance.
