

SMC Reactor Swivel - Small Pro | Pro Hardware

The SMC Reactor Swivels self-orient to help prevent twists/torsion in your rope system. The large version can accommodate up to 3 carabiners and is large enough to pass an ANSI gate though, while the small version accepts a single carabiner. The soft radius on both is ideal for textile anchors.

Key Features

- Heat-treated steel axle
- Sealed high-efficiency ball bearing
- Smooth and rounded sides
- Made in the USA
