

Harken® Ninja MultiAscend

The Ninja MultiAscend is engineered to provide increased efficiency in a range of applications. The dual cam design enables the MultiAscend to act as both a chest ascender as well as a full point of attachment. The innovative dual-stage locking swingplate ensures consistent engagement with the rope, preventing unwanted detachments. In addition, the external release triggers make adjusting the Ninja MultiAscend safe and easy when used as an ascender or a progress capture device on a safety line.

Key Features

- Dual cams smoothly feed rope, maximizing efficiency during ascent
- Ensures consistent engagement with rope and progress capture
- Dual-stage, locking swingplate prevents unwanted detachments
- External release triggers allow easy adjustment and down-climbing
