

11.5 mm PMI® Isostatic Flip-Line Solutions and Kits | Kits

A 23.4 ft. flip line that is ideal for bridge inspection and tower work among other uses. It can be used as an anchor line, as a short decent line, or as a positioning line when needing a compact option when transitioning between fall protection and rope access. The main connection end has a streamlined permanent termination and the other has a sewn end for safety. A 2-foot long, 1-inch tubular webbing chafe guard comes installed. Excellent replacement for worn-out line used arborist and other positioning systems.

Key Features

- Rated sewn eye terminations
- No knots
- Chafe guard
- Super low elongation
- 100% polyester core and sheath
- 11.5 mm PMI® Isostatic rope
