

## Pacific R6V MkII Seeker Lightweight Water Rescue & Recreation Helmet

### Pro | Pro Personal Gear

Tailored for USAR teams, paramedics, rescue teams, and enthusiasts, Pacific's R6 Series of lightweight helmets proves versatile across various scenarios and can be used for a multitude of situations. With distinct features in each model, the R6 series adapts seamlessly to a broad spectrum of situations. The R6V MkII Seeker departs from the traditional configuration of rescue and wildfire helmets. The Seeker has a fiberglass-reinforced composite shell with a single-piece form-molded polyethylene (PE) liner that features water-release holes and full impact protection. The custom PMI Pacific Seeker continues the Pacific tradition of creating versatile helmets that serve as a platform for multiple accessories.
