

SKED® EVAC Tripod Tripods and Accessories |

The small head and extra-long aluminum legs make the SK700 Skedco SKED-EVAC® Tripod the perfect choice for simplicity and performance. When fully extended, the head is 10 feet high and the tripod can support a load up to 5,280 lbf. The load capacity increases as the leg extension is reduced.

Key Features

- Legs are adjustable in 5" increments
- Tripod legs are secured with chains to prevent them from spreading under load
- 3 anchor points
- Winches and other attachments available
- Fully extended height of 10 ft at the anchor
