

Skylotec SPARK Tactical Belay Device and Descender Pro | Pro Hardware

The SPARK TACTICAL is engineered for rigorous, continuous use in the most demanding environments. Tailored specifically for tactical operations, it combines the strengths of leading descent devices used in industrial and rescue settings. SPARK TACTICAL stands out for its design without an anti-panic function, allowing for rapid, precise, and uninterrupted descents. With intuitive, straightforward rope handling, it enables the carabiner to remain connected to the device on the harness. The device's ergonomic design and precise lever operation ensure exceptional control. The advanced rope guide within the device prevents twisting, kinking, and excessive wear, ensuring durability and reliability in the field.

Key Features

- 9mm – 12.5mm Rope Range
- No Anti-Panic-Function
- Compact

Additional Information

Shipping weight | 1.12 lbs

Brand | [Skylotec](#)

Max Descent Speed | 2.00 m/s

Max Service Life | 30 years

Material | Aluminum, Steel

Compliant | ANSI Z359.9, EN 12841, EN 15151-1, EN 341, NFPA 2500 (1983) 2022 Ed. G & T
