

BEAL Birdie | Denver Denver Training Facility |

The BIRDIE is a brake-assisted belay device. Compact, it is also ergonomic for a better grip. It can be used with all dynamic single ropes, with a diameter of 8.5 to 10.5mm. Each of Beal's belayers has an individual number that guarantees its traceability. Entirely made of metal, with cam and friction components in stainless steel for great durability. The rope exits following the device's axis, to avoid twisting.

Key Features

- All steel construction.
- Compact and ergonomic.
- Does not twist rope.
- Compatible with ropes 8.5mm to 10.5mm.
