

PMI® Crane-Tek Rescue Solution Solutions and Kits | Solutions

The PMI® Crane-Tek Rescue Solution is designed to meet the requirements of workers in high places (ie cranes, etc) who are not wearing a harness but may need to evacuate themselves using an emergency harness and rope for controlled descent in the event of an emergency. The PMI® D4 by ISC Descender forms the foundation of this kit, allowing for immediate rope descent. The PMI® D4 Descender features a double-action safety mechanism that stops the user if they let go of the handle or if they pull the handle too hard in a panic. When the panic lock is engaged, simply turn the handle until it gets back into the lowering position and continue your descent.
