

The Miller Board is a versatile spinal immobilization board and litter that comes complete with a full head and body harness. The harness system allows the patient to be rotated for airway management or to facilitate a difficult rescue without jeopardizing spinal alignment. The Miller board is constructed of high visibility yellow resin and has an x-ray translucent foam core. The Miller Board can be used to extricate the patient, and then tie the board into a litter for the evacuation.

Key Features:

Chest straps • Head harness • Unique shoulder strap design • Hook and loop straps allow rapid immobilization of a patient
